CHRISTIAN DIOR COUTURE
HIRING TEAM – AI FACTORY
FRANCE

SUBJECT: APPLICATION FOR LEAD DATA SCIENTIST (H/F) – AI FACTORY

JOB REFERENCE: LEAD DATA SCIENTIST

Dear Dior AI Factory Team,

I am writing to express my strong interest in the Lead Data Scientist (H/F) position at Christian Dior Couture. As a Data Science and Artificial Intelligence student at Breda University with hands-on experience in AI engineering, data-driven project development, and a strong sense of aesthetic and precision, I am excited about the opportunity to contribute to the AI Factory's innovation journey.

In my academic career and personal projects, I have led and collaborated on multiple end-to-end data initiatives, including deep learning for medical image classification, predictive modelling in mobility (in partnership with ANWB), and the development of a computer vision pipeline for plant phenotyping. These experiences have sharpened my ability to align technical solutions with real-world impact—something I see echoed in Dior's commitment to excellence, creativity, and data-driven decision-making.

I am confident in my technical abilities with Python, SQL, TensorFlow, OpenCV, and cloud-based workflows. I bring a collaborative spirit, an analytical mindset, and a drive for continuous improvement. I am particularly drawn to Dior's focus on sustainability through Green IT and would be eager to implement environmentally conscious practices within AI project lifecycles.

I would be thrilled to further discuss how I can contribute to Christian Dior Couture's data ambitions and the AI Factory's continued growth. Thank you for considering my application.

Sincerely,
Victoria Vicheva
