SUBJECT: APPLICATION FOR POWER BI INTERNSHIP – SALES DASHBOARD DEVELOPMENT

Dear Mr. Kraal,

I am writing to express my interest in the internship opportunity at Bureau de Wit focused on developing a (semi-)automated Power BI dashboard for the sales department. As a second-year student in Applied Data Science and Artificial Intelligence at Breda University of Applied Sciences, I am passionate about data-driven decision-making and eager to contribute my analytical and technical skills in a dynamic, real-world environment.

In my academic projects, I have built interactive dashboards in Power BI, visualized key KPIs, and performed in-depth data analyses using Python and SQL. Notably, I created a predictive model for traffic incident severity in collaboration with ANWB and developed a variable analysis dashboard that earned a university award. These experiences have strengthened my ability to translate complex datasets into clear and actionable insights.

What excites me about this internship is the opportunity to collaborate with account managers and back office teams to identify reporting needs and enhance strategic alignment. I am confident in my ability to work independently, think critically, and communicate effectively with stakeholders at various levels – skills I've honed through cross-functional projects and my multilingual background (English, German, Bulgarian). I would welcome the opportunity to contribute to Eurofins' commitment to innovation, while gaining valuable industry experience within a leading international organization. I am available to begin the internship from [your availability/start date] and am happy to provide further information or references upon request.

Thank you for considering my application. I look forward to the possibility of speaking with you in more detail.

Kind regards,

Victoria Vicheva
